SEWSCAP is a South East and Mid Wales Schools and Public Building Contractors collaborative Framework hosted by Cardiff Council acting on behalf of in excess of 13 local contracting authorities, as well as wider Welsh public sector bodies, including Universities, colleges, Welsh Government, and their associated trading bodies.

The framework places Social Value at the very heart of its principles, which is evident through the Social Value Charter that Contractors sign up to; the supporting of local third sector agencies and charities by the Framework, the launch of learning pathways in relation to sustainability; as well as the successful bid and launch of The Onsite Construction Academy South East Wales.

Over 136 schemes have already been procured through the Framework at an estimated value of over £1.2bn.

The scope of the Framework covers refurbishment, new builds, and modular solutions from £250k up to £100m. The framework has been divided into lots, to achieve a range of contractor sizes and abilities in keeping with the anticipated range of projects and well over 450 Welsh Small to medium enterprises (SME's) have been utilised in the supply chains of the main contractors some of whom are Welsh SME's in their own right. Typically contractors are spending over 80% of their spend in the Welsh economy as part of the school build project and offering opportunities for apprenticeships, trainees and general employment as part of their contracts.

SEWSCAP are delighted to support the CEW Awards in 2021 for the second year running.

# Introduction

Welcome to our fifteenth Constructing Excellence in Wales Awards in which we showcase the best of the best in Welsh construction.

Traditionally this is one of the biggest events of the year in the Welsh construction calendar: a celebration of YOUR best practice. The CEW Awards are a clear demonstration of the core strength of construction and the built environment in Wales.

The past 12-months have been the most challenging for many years, but our industry has responded to the impact of COVID-19, shortages of materials, Brexit and other political and social issues with ingenuity, steadfastness and, of course through collaboration. We have confronted these challenges and uncertainties and our industry remains the nations great enabler reinforced by a desire and commitment to deliver buildings, roads, bridges, and facilities of all kinds in a collaborative and sustainable manner.

The CEW Awards is an opportunity to come together to congratulate ourselves on a job well done. There are some truly ground-breaking examples of best practice from all corners of Wales provided by developers, clients, contractors, engineers, specialist and sub-contractors of all disciplines alongside design teams and other consultants – so let us celebrate this together.

As usual we were overwhelmed with outstanding entries giving our judges a real headache. Year on year your entries demonstrate real performance improvement in the Welsh construction industry. There were 37 hours of judging presentations, and project values were £699 million: some great stats but also real time examples of how well YOU as an industry is performing in these challenging times. Well done to everyone and thank you for your dedication, commitment, and willingness to showcase best practice through the CEW Awards.

CE Wales relies on your support as a sector, through your membership, our Exemplar Programme, attending our events and training courses and through collaboration and sharing of best practice. The CEW Awards are evidence that we stand for delivers real benefits. If you believe in collaboration, a focus on value and want to continue to be a key part of the organisation responsible for bringing every aspect of this industry of ours together under one roof, then get involved, by being a member and sharing your thoughts so we can truly be 'One Voice' for the construction sector in Wales.

We would like to say a big thank you to our sponsors, especially our Headline Sponsor SEWSCAP. Every event of this kind, just like a construction project, needs backers and supporters and without our sponsors we would not be able hold this event. Thank you!

# Integration & Collaborative Working Award

Judges: Mark Adams Vince Hanly Milica Kitson

Collaborative working is central to the core values of Constructing Excellence and its drive for positive change in construction. It is most likely to manifest in the delivery of specific projects, however those who can demonstrate a culture across a series or programme of projects show leadership in a sustained approach. Integration of the supply chain, the client and end users will normally lead to a better outcome satisfying all stakeholders.

# SME of the Year

Judges: Ed Evans   Antonia John   Helen Kane

SMEs are the backbone of the industry and are recognised by Constructing Excellence for their dominance of and contribution to the supply chain. Department for Business Innovation and Skills suggest that 99.9% of UK construction contracting businesses are SMEs and some of the greatest innovation and best practice can be identified in this sector.

Sparkles Cleaning  
Services Wales & West

# Sustainability Award

Judges: Robert Chapman Jo Charles Iona Hughes Colin King

High environmental and climate performance in construction aims to meet present day needs for housing, working environments and infrastructure without compromising the ability of future generations to meet their own needs in times to come. It seeks to limit impact on the natural environment and demonstrate whole life sustainability. It is most effective when organisational culture, high design quality, technical innovation and transferability are abundant.

# Health, Safety & Wellbeing Award

Judges: Jane O'Leary John Peacock Stella Saunders

Health, Safety & Wellbeing is of paramount importance and a culture of 'safety first' is crucial to performance. Overarching health and safety risk management systems and effective health initiatives are fundamental to reducing or eliminating all types of incidents and promoting health and well-being across the supply chain.

# Offsite Award

Judges: Andrew Carpenter   Simon McWhirter   Andrew Thomas

A number of factors are converging to make offsite construction a more attractive solution than ever before. It can help address systemic failures including low productivity, low predictability, low margins, adversarial pricing, lack of culture for collaboration, limited R&D and investment in innovation and poor image.

# Conservation & Regeneration Award

Judges: John Edwards Trevor Francis Colin King

The preservation or rehabilitation of old or historic buildings and sites is often an important part of neighbourhood revitalisation, providing physical and psychological focus for the community and creating jobs and investment opportunities. Construction work that involves the conservation and regeneration of historic buildings requires great care and specialist skills and techniques.

# Innovation Award

Judges: Mark Davies   Andrew Thomas   Pierre Wassenaar

Innovation is widely recognised as the critical factor for increased and sustained productivity and growth. It demonstrates an organisation's confidence, capacity and appetite for improved performance and productivity gains. Innovation is most effective as a holistic approach that identifies both demand and ideas and is most successful when supported by collaboration between customers and the supply chain.

Bouygues UK is part of the diversified, industrial Bouygues Group, operating in more than 80 countries, and whose businesses are organised around three sectors of activity: construction, telecoms and media. Bouygues UK offers a comprehensive range of construction and project management services to private and public sector clients alike. As part of a global and multi-faceted organisation, we have direct access to best practice knowledge gleaned from an impressive back catalogue of major projects.

Headquartered in London since 1997, and with a presence throughout the UK, our expertise encompasses the design and construction of high profile, technically complex facilities in the Higher Education, Healthcare, Science & Research and Data Centre markets. We are also a significant player in the Residential, Secondary Education, Commercial and Energy sectors.

Our portfolio of blue-chip clients includes:

- Local Authorities
- Universities and Colleges
- The Pharmaceutical & Life Science industry
- The Home Office
- NHS Trusts
- Major developers and Data Centre operators

Working alongside our sister company Bouygues Energies & Services, and our in-house specialist development business, Linkcity, we boast a track record of success in financing, operating and maintaining a variety of prestigious developments. This is fundamentally underpinned by a thorough understanding of complex PFI and PPP-style deals. Linkcity has a portfolio of around 20 developments, with a gross development value in excess of £1.3 billion.

We have an innovative mindset, always seeking ways in which to improve and enhance the way in which we deliver our services and add value for our clients. For example, we maintain a keen focus on sustainability, carbon reduction and digital transformation, often using our global headquarters on the outskirts of Paris as a "Living Lab" in which to develop and test our ideas. As part of this, we collaborate extensively with technology start-ups, providing them with the support and market access need to help grow their business.

The Civil Engineering Contractors Association (CECA) Wales represents 60 of Wales' largest and smallest civil engineering contracting businesses with a cumulative annual turnover in excess of £1bn and employing over 6,000 people. These businesses play a huge part in supporting communities across Wales and make a significant contribution to the economic, social, environmental and cultural wellbeing of our nation. Our members are also major providers of training and apprenticeship opportunities. On a more fundamental level it is our members who will build the infrastructure that our nation needs to prosper.

## CIOB

The Chartered Institute of Building is at the heart of a management career in construction.

We are the world's largest and most influential professional body for construction management and leadership. We have a Royal Charter to promote the science and practice of building and construction for the benefit of society, and we've been doing that since 1834. Our members work worldwide in the development, conservation and improvement of the built environment.

We accredit university degrees, educational courses and training. Our professional and vocational qualifications are a mark of the highest levels of competence and professionalism, providing assurance to clients and other professionals procuring built assets.

CLAW is the Consortium of Local Authorities in Wales that supports the professional and technical interests of property management in local government in Wales.

CLAW was formed in 1962 and now works with representatives from the elected members and officials of all Welsh local authorities for the promotion of excellence in the construction, maintenance, and management of property assets.

G4C Wales (Generation for Change) is a driving force in Welsh construction with a focus on the industry's young professionals who have an interest in the Welsh built environment.

G4C Wales' core idea is to harness the power of this generation to drive change and improve the way the industry functions.

Its goal – and this applies to G4C in Wales and right across the UK – is to become the organisation that is the driving force for change, through the development and connection of the future industry leaders. This dynamic ambition means that G4C gives its members access to innovative industry thinking, enables networking with a broad cross section of industry professionals and provides opportunities to grow and learn through initiatives and events which are free to attend. Whether you are an established young professional or a newcomer, involvement in these initiatives will provide an understanding of the strategic development and future shape of the construction industry.

Greenbuild Consult are a Sustainable Construction Consultancy specialising in compliance and design advice; we work with clients, architects, developers and construction companies alike to improve the sustainability credentials of their projects.

We combine innovative sustainable design with the immediate practicalities of achieving necessary statutory compliance and accreditation generating long term environmental and commercial value for all of our clients.

Based upon sound practical experience gained throughout the sustainability and construction sectors, GreenBuild's consultants can provide extensive services relating to key sustainability and environmental aspects of projects.

Our sustainability consultants are licensed and accredited to deliver in-house services from all facets of the sustainability sector, including BREEAM assessments, Part L compliance, dynamic simulation modelling, energy strategies, and complex building physics analysis. We are highly motivated, responsive and personable, and are focused on delivering the most viable solutions for our clients, balancing environmental impacts with economic constraints.

With a strong focus on Client needs, the ever-increasing sustainable and subsequently financial impacts imposed upon new construction projects are successfully mitigated through our collaborative and proactive approach to every project, which ensures sustainability targets are achieved as efficiently as possible with little or no disruption to the Design Team, Contractor, and Client.

We are ISG. As a global construction specialist, we make places where people and businesses thrive.

Our vision comes to life through partnership. We build relationships on trust, collaboration and open communication, because it's the only way to create places as smart and resilient as the people who use them.

We're proud of our unparalleled track record and reputation for delivery we've built over 30 years. We're even prouder to work with some of the world's most successful and enduring businesses, cities and institutions.

We've come this far because we embrace change. Delivering the places of tomorrow requires the ability to think big and collaborate effectively – it requires what we call, Delivery Dynamic.

Delivery Dynamic is the secret behind our great relationships, and the driving force behind our transformational results. It's who we are. It's what we do.

Kier are the largest regionally based builder in the UK, delivering over 170 projects each year ranging from £500k to £250m in value; working with central and local Government, regulated and blue-chip private sector clients. Our Regional Offices' in Cardiff and Swansea offer a comprehensive construction service throughout Wales. We continue to deliver a blend of work across all values including minor works programmes delivered via the SCAPE Framework for key clients in Wales. Following significant success on the South East and South West Wales Regional Contractors Frameworks, we are delighted to be successfully delivering multiple high-profile schemes in the region; in conjunction with £90M of healthcare generated via the Building for Wales Framework. Our current flagship projects in Wales include the Centre for Integrative Semiconductor Materials (CISM), which will deliver a bespoke, integrated facility for semiconductor research and technology development on Swansea University's Science and Innovation Bay Campus; and the creation of 401 high quality student accommodation studios in the heart of Cardiff city centre for Select Property Group.

The future of Education is paramount and we are excited to be involved with delivering several schools, including Fitzalan High School which will see state-of-the-art educational facilities in a brand-new school; Ysgol Y Graig Primary School in Merthyr Tydfil and the new Tan-Y-Lan Welsh Medium School in Swansea.

We have recently seen the successful completion of landmark projects such as the new state-of-the-art IMPACT Research Centre at Swansea University, providing future proof highly specialised research laboratories with a dynamic environment for collaboration of industry and academia; and the 4500m<sup>2</sup> Sancta Maria private community hospital on SA1 development for The Healthcare Management Trust.

Across our regional infrastructure, we have a one team approach that leverages the strength of a larger Kier Group to provide national thinking with local delivery. Being close to the communities we operate in, we are committed to having a positive economic, social and environmental impact; and our targeted carbon strategy is based on getting to net zero as quickly as possible, whilst avoiding unnecessary off setting.

## **KNOX & WELLS LTD**

BUILDING CONTRACTORS • ESTABLISHED • 1888

Founded in 1888 in Roath, Cardiff, Knox & Wells is one of the oldest building companies in the UK. The firm has a long history and strong reputation in conservation and regeneration work, that is based on a highly skilled and well trained workforce, making us a natural sponsor of the Conservation and Regeneration Award. We are delighted to support Constructing Excellence Wales and their annual awards, recognising excellence in this particular area of construction.

## **MORGAN SINDALL**

Morgan Sindall Construction is a UK business with a network of local offices. Project capabilities cover the entire range of construction activities, from special works and repair and maintenance, to major landmark schemes delivered as standalone projects or as part of larger multiple project frameworks. The company operates across the public and private sectors to deliver the social infrastructure around us – from schools, universities and hospitals to retail, office and leisure environments. Morgan Sindall Construction is part of Morgan Sindall Group plc, a leading UK construction and regeneration group with revenue of c£3 billion and which operates through six divisions of Construction & Infrastructure, Fit Out, Property Services, Partnership Housing, Urban Regeneration and Investments.

Our teams are focused on improving the lives of the people in our local communities as we build the places where they live, learn, work, play, care and protect. So whilst we actively build anything from schools to offices, we're committed to delivering so much more than that. Whether that's investing in volunteer work, inspiring the next generation through strategic work experience programmes, or spending time to help our customers settle in to their new buildings, our efforts reach way beyond the build".

## **M MOTT MACDONALD**

Mott MacDonald is a management, engineering, and development consultancy delivering solutions adding value to many areas of everyday life – from transport, energy, buildings, water, and the environment to health and education, industry and communications.

We're involved in:

- solving some of the world's most urgent social, environmental and economic challenges
- helping governments and businesses plan, deliver and sustain their strategic goals
- responding to humanitarian and natural emergencies
- improving people's lives including industry leadership to capture enhanced value in line with the aims and ambitions of the Future Generations Act.

Our expertise by sector includes buildings, communications, defence, education, environment, health, industry, mining, oil and gas, power, transport, urban development, water, wastewater, and more. Our skills encompass planning, studies and design, project finance, technical advisory services, project and programme management, management consultancy, and beyond.

For every project, we create the blend of talent needed to create the right result – appropriate; cost, carbon, and resource-efficient; safe, easy, and swift to deliver and operate; reliable and resilient; delivering great outcomes.

The North Wales Construction Partnership (NWCP) is the second iteration of the region's local authority-driven construction framework, building on the award-winning work that has already changed how construction projects are procured in the region. The management of the Framework is led by Denbighshire on behalf of the 6 North Wales authorities and it may also be utilised by other public sector bodies across the region, providing value for money and wider benefits to North Wales.

The NWCP actively promotes the implementation of innovative ideas and solutions by creating joint ownership through our Special Interest Groups and third sector partners, providing a fundamental change in project delivery enabling better outcomes for our communities.

Our ambition is to secure improvements to the build environment through delivery of best value, energy efficiency, sustainable facilities; utilising the highest possible safety and environment standards, innovation and collaboration, whilst creating a lasting legacy through targeted investment in employment and communities.

The framework will support the development of a new generation of construction professionals, to help develop a sustainable environment for contractors and continue with its ethos of openness and flexibility, which has already been achieved through engagement and two-way communication between the authorities and contractors / suppliers

Representing over 800 members across the structural timber industry and associated supply chain, the STA has an objective to enhance quality and drive product innovation through technical guidance and research.

The Association's independently assessed membership and quality standards scheme - STA Assure, is recognised by the NHBC and six leading warranty and building control bodies. This scheme ensures all manufacturing members meet or even exceed current legislation and regulatory requirements. As part of their continual development programme, the STA has been collaborating with the Construction Scotland Innovation Centre, the University of Edinburgh and BRE to produce fire safety in use guidance for timber frame buildings. Fire safety in use effects all forms of construction. All buildings must be designed to comply with the functional protocols of the Building Regulations for fire safety requirements, as a minimum standard.

The STA has invested in an industry leading fire in use research project to test and prove commonly used timber frame wall, floor and roof make ups used in the UK marketplace. This research now forms part of the STA's best practice guidance and is free to download from: [www.structuraltimber.co.uk/links/research-documents](http://www.structuraltimber.co.uk/links/research-documents)
