10 well being objectives

Make our cities, towns and villages even better places in which to live and work

We will:

- Build 20,000 new low carbon social homes for rent.
- Establish Unnos, a national construction company, to support councils and social landlords to improve the supply of social and affordable housing.
- Reform housing law and implement the Homelessness Action Group's recommendation to fundamentally reform homelessness services to focus on prevention and rapid rehousing.
- Publish a White Paper to include proposals for a right to adequate housing including fair rents and new approaches to making homes affordable for those on local incomes.
- Take forward actions to cap the number of second homes, bring more homes into common ownership and licence holiday lets.
- Support cooperative housing, community-led initiatives, and community land trusts.
- Create a timber based industrial strategy that can develop and sustain the high value production and processing of Welsh wood.
- Decarbonise more homes through retrofit, delivering quality jobs, training and innovation using local supply chains.
- Explore where services and contracts can sustainably and affordably be brought back into a strengthened public sector.
- Ensure that each region in Wales has effective and democratically accountable means of developing their future economies.
- Keep regional partnership working under review with local partners.
- Make 20mph the default speed limit in residential areas.
- Ban pavement parking wherever possible.
